Formulas and Production Process of Surfactants, Disinfectants, Cleaners, Toiletries, Sanitizers, Antibacterial and Beauty Products, Personal Care Products, Health Care Products

(Body Lotion, Hair Gel, Floor Cleaner, Phenyl, Glass Cleaner, Liquid Detergent, Detergent Powder, Toilet Cleaner, Detergent Soap, Liquid Soap, Hand Wash, Hand Sanitizer, Herbal Shampoo, Mosquito Coil, Herbal Cream, Shaving Cream, Henna Based Hair Dye, Utensil Cleaning Bar, Air Freshener, Shoe Polish, Tooth Paste, Naphthalene Ball)
Household cleaners are some of the most widely purchased consumer products. Other than plastic and synthetic fibers materials, there is probably not another class of chemical products that people come into contact with more frequently. We buy them in grocery stores, store them in our homes, use them where we eat, sleep, bathe, and work, and dispose of them down the drain after use.

The term surfactant comes from the words surface active agent. A surfactant is briefly defined as a material that can greatly reduce the surface tension of water when used in very low concentrations.
Surfactants, or surface active ingredients, are the wetting and foaming agents which form the basis for most aqueous cleaners. Anionic, nonionic, and amphoteric surfactants are used mainly for cleaning. Cationic surfactants are often used as antimicrobials. The surfactants market size is 30.64 Billion in 2016 and is projected to reach USD 39.86 Billion by 2021, registering a CAGR of 5.4% between 2016 and 2021.

The global surfactants market is expected to reach a valuation of US$28.8 billion by 2023, increasing at a 4.20% CAGR upon its 2014 value of close to US$20.3 billion.
Antimicrobial ingredients were found in a number of products. As was the case with general purpose cleaners, quaternary ammonium compounds were most common. Also found were sodium hypochlorite and phenolic derivatives.

Disinfectants contain antimicrobial agents, such as pine oil, sodium hypochlorite, quaternary ammonium compounds or phenols, which kill bacteria and viruses on surfaces. A surface should be free of heavy soil for effective disinfection. Disinfectant cleaners contain surfactants and builders to remove soil in addition to antimicrobial agents to kill germs.
Disinfectants are products whose major function is to kill bacteria on a surface, but which are not necessarily formulated to remove dirt, stains, or other soils.

The global home healthcare market is expected to reach USD 349.8 Billion by 2020 from USD 227.5 Billion in 2015, at a CAGR of 9.0% during the forecast period. The growth of this market is mainly driven by factors such as rising geriatric population across the globe, growing need of cost-effective healthcare delivery due to increasing healthcare costs, rising incidences of chronic diseases, and technological advancements in devices.
However, changing reimbursement policies, limited insurance coverage and risks to personal safety of home care workers are the factors restraining the growth of this market to a certain extent.

The market size of Industrial & Institutional (I&I) cleaning chemicals was USD 39.24 Billion in 2014, and is projected to reach USD 50.24 Billion by 2020, at a CAGR of 4.2% between 2015 and 2020. Rising awareness on health & hygiene, safety liability on the part of the company or an institution and growing demand from the application industries are the major drivers for the market.
This handbook contains processes formulae of various products and providing information regarding manufacturing method. It covers raw material suppliers, photographs of plant & Machinery with supplier’s contact details and some plant layout & process flow sheets. The Major Contents of the book are phenyl, floor cleaner, glass cleaner, toilet cleaner, mosquito coils, liquid detergent, detergent powder, detergent soap, naphthalene balls, air freshener, shoe polish, tooth paste, shaving cream, liquid soaps and hand washes, herbal shampoo, henna.
based hair dye, herbal creams, utensil cleaning bar, hand sanitizer etc. 1/15 It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of surfactants, disinfectants, cleaners, toiletries, personal care products manufacturing.
Table of Contents

1. Introduction
   Disinfectant
   Advantages & Disadvantages of different Classes of Disinfectants
   Surfactant
   Classification of Surfactants
   Market Overview

2. Phenyl
   Uses
   Properties
   Manufacturing Process
3. Floor Cleaner
Composition of Floor Cleaner
Uses of Floor Cleaner
Raw Material Required for Floor Cleaner
Manufacturing Process of Floor Cleaner
Process Flow Flow Diagram of Floor Cleaner

4. Glass Cleaner
Uses & Applications
Properties of Glass Cleaner
Formulations of Glass Cleaner
1. Acidic Glass Cleaner
2. Ammoniacal Glass Cleaner
3. Glass Cleaner without Ammonia
Manufacturing Process
Process Flow Flow Diagram of Glass Cleaner
5. Toilet Cleaner
Properties

Basic Raw Material
Manufacturing Process
Process Flow Diagram
7. Liquid Detergent
   Uses of Liquid Detergent
   Liquid Detergent Formulations
   1. Heavy Duty Liquid Detergent
   2. Light Duty Liquid Detergent
   Manufacturing Process
   Process Flow Flow Diagram

8. Detergent Powder
   Properties of Detergent Powder
   Uses & Application
   Manufacturing Process
   Process Flow Flow Diagram
9. Detergent Soap
   Properties
   Uses & Applications
   Detergent Cake Formulation
   Manufacturing Process
   Process Flow Diagram

10. Naphthalene Balls
    Uses & Application
    Properties
    Manufacturing Process
    Process Flow Diagram

11. Air Freshener (Odonil Type)
    Properties
Uses and Applications
Formulation for Preparing Odonil Type Solid Deodorant Cake
Manufacturing Process
Process Flow Diagram

12. Shoe Polish
Uses and Applications
Formulation of Different Type of Shoe Polish
Black Boot Polish
Dark Tan Polish
Concentrated Liquid Shoe Polish (Black)
Manufacturing Process
Coloured Polishes
Process Flow Diagram

13. Tooth Paste
Components of Toothpaste
Typical Toothpaste Ingredients
Manufacturing Process
Process Flow Diagram

14. Shaving Cream
Raw Material Used for Shaving Cream
Application of Shaving Cream
Formulation
Manufacturing Process

15. Liquid Soaps and Handwashes
Method of Manufacture

16. Herbal Shampoo
Properties
Manufacturing Process of Herbal Shampoo
Composition of Formulated Herbal Shampoo
Herbal Anti-Dandruff Shampoo
Formulation
Formulation
Method of Herbal Anti-Dandruff Shampoo
17. Henna Based Hair Dye
   Properties of Hair Dyes
   Formulations for Hair Dye
   Process Flow Diagram of Herbal Shampoo
   A. For Black Colour
   B. For Making Burgundy Colour
   C. For Making Chase Nut Colour
   D. For Making Special Brown

18. Herbal Creams
   Properties of Herbal Cream
   Manufacturing Process of Herbal Cream
Process Flow Diagram

19. Utensil Cleaning Bar
Uses & Applications
Formulation
Manufacturing Process
Process Flow Diagram

20. Hand Sanitizer
Physical and Chemical Properties
Ingredients
Uses
Formulation of Herbal Hand Sanitizer
Manufacturing Process

21. Formulations

Who are we?

- One of the leading reliable names in industrial world for providing the most comprehensive technical consulting services

- We adopt a systematic approach to provide the strong fundamental support needed for the effective delivery of services to our Clients’ in India & abroad
We at NPCS want to grow with you by providing solutions scale to suit your new operations and help you reduce risk and give a high return on application investments. We have successfully achieved top-notch quality standards with a high level of customer appreciation resulting in long lasting relation and large amount of referral work through technological breakthrough and innovative concepts. A large number of our Indian, Overseas and NRI Clients have appreciated our expertise for excellence which speaks volumes about our commitment and dedication to every client's success.
We bring deep, functional expertise, but are known for our holistic perspective: we capture value across boundaries and between the silos of any organization. We have proven a multiplier effect from optimizing the sum of the parts, not just the individual pieces. We actively encourage a culture of innovation, which facilitates the development of new technologies and ensures a high quality product.
What do we offer?

- Project Identification
- Detailed Project Reports/Pre-feasibility Reports
- Business Plan
- Industry Trends
- Market Research Reports
- Technology Books and Directory
- Databases on CD-ROM
- Laboratory Testing Services
- Turnkey Project Consultancy/Solutions
- Entrepreneur India (An Industrial Monthly Journal)

www.entrepreneurindia.co
How are we different?

- We have two decades long experience in project consultancy and market research field
- We empower our customers with the prerequisite know-how to take sound business decisions
- We help catalyze business growth by providing distinctive and profound market analysis
- We serve a wide array of customers, from individual entrepreneurs to Corporations and Foreign Investors
- We use authentic & reliable sources to ensure business precision
Our Approach

- Requirement collection
- Thorough analysis of the project
- Economic feasibility study of the Project
- Market potential survey/research
- Report Compilation

www.entrepreneurindia.co
Who do we serve?

- Public-sector Companies
- Corporates
- Government Undertakings
- Individual Entrepreneurs
- NRI’s
- Foreign Investors
- Non-profit Organizations, NBFC’s
- Educational Institutions
- Embassies & Consulates
- Consultancies
- Industry / trade associations
