Project Opportunities in Production of Condoms.

Latex Condom Manufacturing.

How to Manufacture Condoms (Lubricated)?
Introduction

A condom is a sheath-shaped obstruction device used during sexual intercourse. It is very beneficial for reducing the chances of pregnancy. It also decreases the risk of sexually transmitted infections (STIs) such as HIV/AIDS. There are different types of condoms available in the market with the variety of thickness, texture, material, size, color and taste. Condoms are highly effective to reduce the probability of pregnancy if used consistently and correctly.
The use of condoms, conceived primarily as a tool for family planning to curtail population growth, has attained a primacy in arresting the spreading of the dreaded disease, AIDS.

Increasing awareness regarding sexually transmitted diseases (STD) and HIV is the major driving factor of condom market in U.S. Increasing prevalence of sexually transmitted diseases (STD) and HIV in U.S. is expected to boost the demand for condoms. In addition, increasing the need for family planning coupled with population control is expected to boost the condom market.
India condom market is projected to reach $180 million by 2022 on account of rising consumer awareness about HIV/STIs. Moreover, expanding product portfolio of the leading players, growing e-commerce penetration, rising youth population and increasing trend in average marriable age are expected to act as the other major drivers for India condom market in the coming years.

The Indian market has terrific potential. Only 21 percent of the country's 138.9 million eligible couples use condoms at present. If the figure were to rise to 50 per cent, demand would spurt to 5,000 million pieces a year. As domestic demand and export potential grow, other companies are also getting into the act.
Drivers:

- Rise in use of condoms for family planning propels the market growth.
- Innovations in male condoms such as anti-ejaculation chemicals increases consumer interest.
- Increase in promotional campaigns on the concept of safe sex, further helping the market to grow.

U.S. Condom Market, 2017-2022 (Million Units) (USD Million)
The global condom market is expected to cross $11 billion by 2023. Factors such as an increase in per capita discretionary income of people globally and a rapid growing number of dual-income households in developing as well as developed markets are major growth factors for the global condom market. Male contraceptives will remain the dominant segment despite growing popularity of female condom. Further more comprehensive sex education for the most active demographic segment such as the teenagers is a major driver for the condom market growth.
The global market for condoms is on a steady growth trend, backed by increasing emphasis on preventing unwanted pregnancy and sexually transmitted diseases; growing popularity of female condoms; and continuous product innovations by leading manufacturers. Other growth drivers include growing preference for condoms as preferred choice of contraception given the potential health hazards of using contraceptive pills; use of condoms by gays; increased and enhanced commercial advertising stressing upon social acceptance; expanding distribution channels; increasing public health campaigns promoting the concept of safe sex and eye-catching and unique packaging by manufacturers. Initiatives taken up by government are also playing a role in propelling market growth.
Condom marketing is moving towards emphasis on improving sexual pleasure. Manufacturers in this regard are constantly innovating new products such as super-thin, biodegradable, and custom-fit condoms. Other innovations include glowing as well as sports-themed condoms, female condoms fitted with Bluetooth outer ring, and male condoms with anti-ejaculation chemicals. One of the major objectives behind all these recent product innovations is to significantly enhance the overall pleasure, and position condom as a product that improves sex.

Another notable trend in the condoms market is the growing popularity of female condoms.
Female condoms are being viewed as a way of providing females with more control over their own sexual safety, and helps in preventing unwanted pregnancy as well as spread of STDs. Condoms, developing countries are expected to drive future growth given the relatively strong economic activity, and higher proportion of younger demographics. Limited condom users and lack of awareness offer untapped opportunities for growth. Condom use specifically in countries like India and China is growing continuously, on account of increasing population, strong economy, and heightened public awareness that condom provides protection against STIs. Asia-Pacific represents the largest as well as the fastest growing market worldwide.

### BEP
- **BEP - Maximum Utilisation Year**: 5 years
- **Cash BEP (% of Installed Capacity)**: 48.16%
- **Total BEP (% of Installed Capacity)**: 52.74%

### IRR, PAYBACK and FACR
- **Internal Rate of Return (%age)**: 25.26%
- **Payback Period of the Project (In Years)**: 2 years 4 months
- **Fixed Assets Coverage Ratio (No. of times)**: 3.390
Major Queries/Questions Answered in the Report?

1. What is Condom Manufacturing industry?

2. How has the Condom Manufacturing industry performed so far and how will it perform in the coming years?

3. What is the Project Feasibility of Condom Manufacturing Plant?

4. What are the requirements of Working Capital for setting up Condom Manufacturing plant?
5. What is the structure of the Condom Manufacturing Business and who are the key/major players?

6. What is the total project cost for setting up Condom Manufacturing Business?

7. What are the operating costs for setting up Condoms Manufacturing plant?

8. What are the machinery and equipment requirements for setting up Condom Manufacturing plant?
9. Who are the Suppliers and Manufacturers of Plant & Machinery for setting up Condom Manufacturing plant?

10. What are the requirements of raw material for setting up Condom Manufacturing plant?

11. Who are the Suppliers and Manufacturers of Raw materials for setting up Condoms Manufacturing Business?

12. What is the Manufacturing Process of Condom?
13. What is the total size of land required for setting up Condoms Manufacturing plant?

14. What will be the income and expenditures for Condoms Manufacturing Business?

15. What are the Projected Balance Sheets of Condom Manufacturing plant?

16. What are the requirement of utilities and overheads for setting up Condoms Manufacturing plant?

17. What is the Built up Area Requirement and cost for setting up Condom Manufacturing Business?
18. What are the Personnel (Manpower) Requirements for setting up Condoms Manufacturing Business?

19. What are Statistics of Import & Export for Condom?

20. What is the time required to break-even of Condom Manufacturing Business?

21. What is the Break-Even Analysis of Condom Manufacturing plant?

22. What are the Project financials of Condoms Manufacturing Business?
23. What are the Profitability Ratios of Condom Manufacturing Project?

24. What is the Sensitivity Analysis-Price/Volume of Condom Manufacturing plant?

25. What are the Projected Pay-Back Period and IRR of Condom Manufacturing plant?

26. What is the Process Flow Sheet Diagram of Condom Manufacturing project?
27. What are the Market Opportunities for setting up Condom Manufacturing plant?

28. What is the Market Study and Assessment for setting up Condom Manufacturing Business?

29. What is the Plant Layout for setting up Condom Manufacturing Business?

Reasons for Buying our Report:

• This report helps you to identify a profitable project for investing or diversifying into by throwing light to crucial areas like industry size, market potential of the product and reasons for investing in the product.

• This report provides vital information on the product like it’s characteristics and segmentation.

• This report helps you market and place the product correctly by identifying the target customer group of the product.
• This report helps you understand the viability of the project by disclosing details like machinery required, project costs and snapshot of other project financials

• The report provides a glimpse of government regulations applicable on the industry

• The report provides forecasts of key parameters which helps to anticipate the industry performance and make sound business decisions
Our Approach:

• Our research reports broadly cover Indian markets, present analysis, outlook and forecast for a period of five years.
• The market forecasts are developed on the basis of secondary research and are cross-validated through interactions with the industry players.
• We use reliable sources of information and databases. And information from such sources is processed by us and included in the report.
The report titled “Market Survey cum Detailed Techno Economic Feasibility Report on Condoms” provides an insight into Condoms market in India with focus on uses and applications, Manufacturing Process, Process Flow Sheets, Plant Layout and Project Financials of Condom project. The report assesses the market sizing and growth of the Indian Condoms Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line. And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:
• Good Present/Future Demand
• Export-Import Market Potential
• Raw Material & Manpower Availability
• Project Costs and Payback Period

We at NPCS, through our reliable expertise in the project consultancy and market research field, have demystified the situation by putting forward the emerging business opportunity in the Condom sector in India along with its business prospects. Through this report we have identified Condom project as a lucrative investment avenue.
Niir Project Consultancy Services (NPCS) can provide Detailed Project Report on Project Opportunities in Production of Condoms. Latex Condom Manufacturing. How to Manufacture Condoms (Lubricated)?

Free Instant Online Project Identification and Selection Service

Our Team has simplified the process for you by providing a "Free Instant Online Project Identification & Selection" search facility to identify projects based on multiple search parameters related to project costs namely: Plant & Machinery Cost, Total Capital Investment, Cost of the project, Rate of Return% (ROR) and Break Even Point % (BEP). You can sort the projects on the basis of mentioned pointers and identify a suitable project matching your investment requisites......Read more
Download Complete List of Project Reports:

- Detailed Project Reports

NPCS is manned by engineers, planners, specialists, financial experts, economic analysts and design specialists with extensive experience in the related industries.

Our Market Survey cum Detailed Techno Economic Feasibility Report provides an insight of market in India. The report assesses the market sizing and growth of the Industry. While expanding a current business or while venturing into new business, entrepreneurs are often faced with the dilemma of zeroing in on a suitable product/line.
And before diversifying/venturing into any product, they wish to study the following aspects of the identified product:

- Good Present/Future Demand
- Export-Import Market Potential
- Raw Material & Manpower Availability
- Project Costs and Payback Period

The detailed project report covers all aspect of business, from analyzing the market, confirming availability of various necessities such as Manufacturing Plant, Detailed Project Report, Profile, Business Plan, Industry Trends, Market Research, Survey, Manufacturing Process, Machinery, Raw Materials, Feasibility Study, Investment Opportunities, Cost and Revenue, Plant Economics, Production Schedule,
Working Capital Requirement, uses and applications, Plant Layout, Project Financials, Process Flow Sheet, Cost of Project, Projected Balance Sheets, Profitability Ratios, Break Even Analysis.
